Use-Case Name: 2.0 – Maintain Master Calendar

Description: This is a generalized use case of the user on the master calendar. The master calendar is the collection of all the users owned and viewed calendars. This use case maintains the calendar data of the user. It extends to create calendar, maintain calendar(not owned), and maintain calendar(owned).

Preconditions: The preconditions of the action varies according to which extension the action belongs to. The preconditions of each use-case extension is specified in its own use-case specification file. For a list of this use case's extensions, see Relationships section.

Flow of Events:

The flow of events and its corresponding activity diagram depends on the use-case extension of the activity. See the use case specification of the use case extension for the said details.

Postcondition: Depends on the chosen action extension.

Relationships: This use case extends to the following use cases:
- 2.1 – Create Calendar
- 3.0 – Maintain Calendar (Not Owned)
- 4.0 – Maintain Calendar (Owned)

Special Requirements:
